Projects

Trispy Fades

A responsive full-stack E-commerce booking platform for making haircut appointments, inspired by my personal hobby. Users can create and make changes to their appointments through front-end requests that are linked to back-end CRUD operations. Implemented using the MERN stack (MongoDB, Express, React, Node.js).

Pong

Classic 2D arcade game build using C++ and Raylib. The game is played between a player and the CPU, implemented using C++ concepts: Classes and Inheritance.

Portfolio

Responsive front-end web app to showcase my skills and personal projects. Implemented using React.

Work Experience

HVE Healthcare Assessments

QA Clinical Coordinator

April 2019 - present

- Pre-review accident benefit claims to provide assessment recommendations in accordance with the Customer Service Level Agreements (SLAs) for accident benefit adjusters
- Utilizing SmartSimple's cloud-based automation software and Wisedoc's AI powered automation platform to process medical file documents for various medical professionals ahead of their assessments
- Communicate with colleagues, adjusters, and medical professionals daily to ensure that the necessary medical documentation is processed in a timely manner

Salon Kreative

Barber

Sept – Dec 2018

- Providing quality haircuts, hot towel shaves, and a creative styling experience

Skills
