## Objective

A recent graduate of Computer Science and a proactive learner who is currently self-learning Full Stack Web Development. After having completed a previous degree in Kinesiology and working within the healthcare industry for a few years, I'm excited to embark on this new career path and utilize my skills in a professional setting. My 2<sup>nd</sup> degree taught me the fundamental concepts of Computer Science and introduced me to my very first object-oriented programming languages: Java and C++. Since graduating, I have branched off and continued to immerse myself in different technologies and projects. I am eager to find a position where I can apply my knowledge and continue to grow exponentially under the guidance of experienced mentors.

## Education

**Algoma University - Bachelor of Computer Science (4.0 GPA)**

graduated Apr 2022

**University of Toronto - Bachelor of Kinesiology**

graduated Apr 2018

## Skills

- |              |             |                                   |
|--------------|-------------|-----------------------------------|
| • JavaScript | • REST APIs | • Fluent in English and Cantonese |
| • CSS/HTML   | • C++       |                                   |
| • React JS   | • Java      |                                   |

## Projects

### Weather App

<https://tristanwongg.github.io/weather-app-1/>

- Built a weather app that allows user to search and retrieve the weather details of different cities through a Weather API
- Initial page load retrieves the weather details of the user's current location through a Geocoding API

### Restaurant Page

<https://tristanwongg.github.io/restaurant-page/>

Technologies: JavaScript, Webpack, CSS, and HTML

### Tic Tac Toe

<https://tristanwongg.github.io/tic-tac-toe/>

Technologies: JavaScript, CSS, and HTML

### Library

<https://tristanwongg.github.io/library/>

Technologies: JavaScript, CSS, and HTML

### Admin Dashboard

<https://tristanwongg.github.io/admin-dashboard/>

Technologies: HTML and CSS
